

BMSA

ENVIRONMENTAL POLICY

At Bridgestone Mining Solutions Australia Pty. Ltd. (BMSA), we are committed to protecting the environment and addressing climate challenges. Guided by our Environmental Mission Statement and the Bridgestone E8 commitment, we promote sustainable practices and continuously improve our environmental performance. Through strategic planning and innovative initiatives, we raise awareness and drive sustainability, ensuring a healthier future for generations to come.

WE COMMIT TO CLIMATE ACTION

- **We** acknowledge the importance of environmental protection and commit to continual improvement of our Environmental Management System and energy consumption performance by establishing and communicating measurable goals.
- **We** set measurable environmental objectives aligned with our business strategy, tracking, reviewing, and updating them annually to drive continuous improvement and alignment with our environmental and sustainability targets.
- **We** ensure the allocation of necessary resources and personnel to achieve our environmental targets.
- **We** uphold this policy as a vital step in preserving the environment for future generations.
- **We** are committed to protecting the environment through the sustainable use of natural resources, responsible management and handling of chemicals, waste reduction, and prevention of soil, water, and air pollution.
- **We** promote and encourage the procurement of renewable energy and energy-efficient products.
- **We** monitor and report environmental performance using key metrics such as carbon emissions, energy efficiency, and waste reduction, ensuring progress through regular audits and performance reviews.

WE PROTECT OUR ENVIRONMENT

- **We** prioritise fire safety and emergency preparedness to protect our people and assets.
- **We** value the expertise, insights, and experience of our employees and actively involve them in decision-making processes to improve environmental and energy performance.
- **We** commit to utilising renewable and sustainable processes throughout the lifecycle of our products and services.
- **We** align our processes and services to minimise our environmental footprint. Through active collaboration with our customers and partners, we enhance energy efficiency and lower greenhouse gas emissions.
- **We** consistently support the development and implementation of safe and environmentally friendly technologies.
- **We** assess and mitigate environmental risks to ensure compliance with legal requirements and to prevent harm to the environment. As part of our continuous improvement process, we regularly review and refine these measures to further reduce our environmental impact.
